REFERENCE	PICTURE	DESCRIPTION	COMPLIANCE	DELIVERY TIME
7537001		Model 1 Portable Ozone Generator (Automobile) 220V / 50Hz 80 w 0.5 grams / O3 / H Flow: 100m3 / H 10-15 minutes per vehicle	Standard AENOR UNE 400 - 201 – 94 Residual : 0,05 ppm	1 Week
7537002		Model 2 Portable Ozone Generator (Van - Ambulance) 220V / 50Hz 140 w 1 gram / O3/ H Flow: 100m3/H 10-15 minutes per Ambulance	Standard AENOR UNE 400 - 201 – 94 Residual : 0,05 ppm	1 Week
7537003		Model 3 Portable Ozone Generator (Buses/trains/planes) 220V / 50Hz 160 w 2 grams / O3/ H Flow: 100m3/H	Standard AENOR UNE 400 - 201 – 94 Residual : 0,05 ppm	1 Week
7537005		Model 5 Portable Ozone Generator (Small & Medium size Offices) 220V / 50Hz 190 w 5 grams / O3/ H Flow: 200m3/H	Standard AENOR UNE 400 - 201 – 94 Residual : 0,05 ppm	1 Week
7537010		Model 10 Portable Ozone Generator (Large Surface Areas) 220V / 50Hz 230 w 10 grams / O3/ H Flow: 600m3/H	Standard AENOR UNE 400 - 201 – 94 Residual : 0,05 ppm	1 Week

Ozone is one of the most powerful disinfectants. It is 50 times more effective at disinfection compared to the most popular disinfectant – chlorine, and the effects of its action are visible 3,000 times faster.

The main advantage from the utilization of ozone to disinfection is the fact that ozone is generated on-site and only when needed. There is also no need to monitor side effects of disinfection, as there are no such ones.

COMMON FEATURES IN ALL PORTABLE OZONE EQUIPMENT:

- Ozone lamps: corona discharge effect.
- Dilution: Axial Fan Free Exit
- Manual control
- Filter: Built-in
- Wardrobe: ABS plastic
- Insulation: IP 65
- Regulations: Type A (direct discharge)

NOTES:

- ***Products of own manufacture in plant of Madrid (Spain).***
- ***Delivery time ONE (01) week.***
- ***Check with the sales department for updated prices.***
